- Visit our [blog](#) for updates
- Find the [10 Most Read Nursing Articles](#)

### Library Hours

[Library Staff Available Remotely](#)

Monday - Friday: 9:00a - 5:00p ET

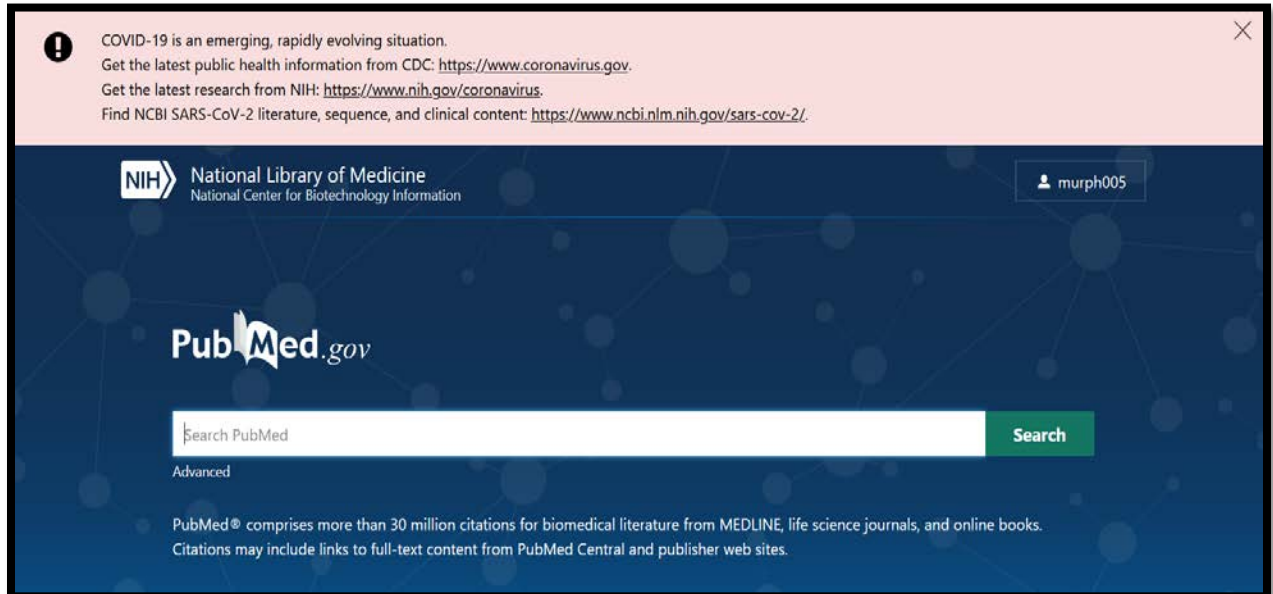

[Building Access: Restricted](#)

Locked with limited badge access for  
Duke Health clinicians and staff

**“If you spend more than five minutes looking  
for something, contact me!”**

# New PubMed Interface

## What's the same?

- You are still searching the same MEDLINE citations – all the same articles, journals, etc.
- Access to your favorite features, like your MyNCBI PubMed account, the MeSH (Medical Subject Headings) database, Clinical Queries, and Single Citation Matcher to search for specific articles
- Now that the new PubMed is the default interface, you have the same access to Duke's specific filters (like study designs) to help you quickly narrow your searches, and the GetIt@Duke button to help you connect to full text articles.

## What's new?

- A seamless search experience on your mobile device
- Ability to cite references quickly in your preferred citation style format (AMA, APA, NLM, or MLA)
- Option to share references via social media or a permalink
- Search algorithm will include more synonyms automatically, in addition to the usual automatic term mapping to MeSH terms
- Search results sorted by best match by default as opposed to the most recent articles (option to select Most Recent)
- The Search Details are now on the Advanced Search page, in the search results section
